

Bear Paw Pediatrics Spring 2008 Newsletter

We are pleased to welcome Kelly Coloff, who will begin seeing patients in June as our new nurse practitioner. Kelly was Dr. Veneman's pediatric student for the last two years. Kelly and her husband, Zach are expecting their first baby in August.

Expanded hours--starting in June, Bear Paw will be open M-F from 10am-7pm! The only pediatric clinic in the valley with EVENING hours!

Thank you for your support and patience as we welcome many students throughout the year. Bear Paw has volunteered to train nurse practitioner students, student physicians, nursing students, physician assistant students, and medical assistant students.

We continue to plan for a new building. Please contact us with your suggestions!

Dr. Veneman will take the lactation consultant board exam in July. There is only one other board certified lactation consultant in the valley.

We will soon offer weekly parent-child play classes featuring: fitness, yoga, sign language, Spanish, arts and crafts, music and movement, open gym, birthday parties, and parents night out. The program will be suitable for the whole family!

We need your recipes and household tips! We will be publishing a family cookbook.

Nature N Nurture is expanding their line of all natural and organic baby and children's products! Come check out our boutique inside Bear Paw Pediatrics. We offer organic cotton (slings, swaddle wraps, bedding, and clothing), organic electrolyte solution, all natural infant and children's omega 3 fatty acids, vitamins, and probiotics, breastfeeding support, natural family planning, lullaby CD's, natural diapers and wipes, homeopathic medicines, and more!

Remember you can pay your bill as well as make your appointment online at www.bearpawpediatrics.com!
